

When accessing ebooks on Overdrive and Libby, did you know that you can alter the size of the text?

All you need to do is:

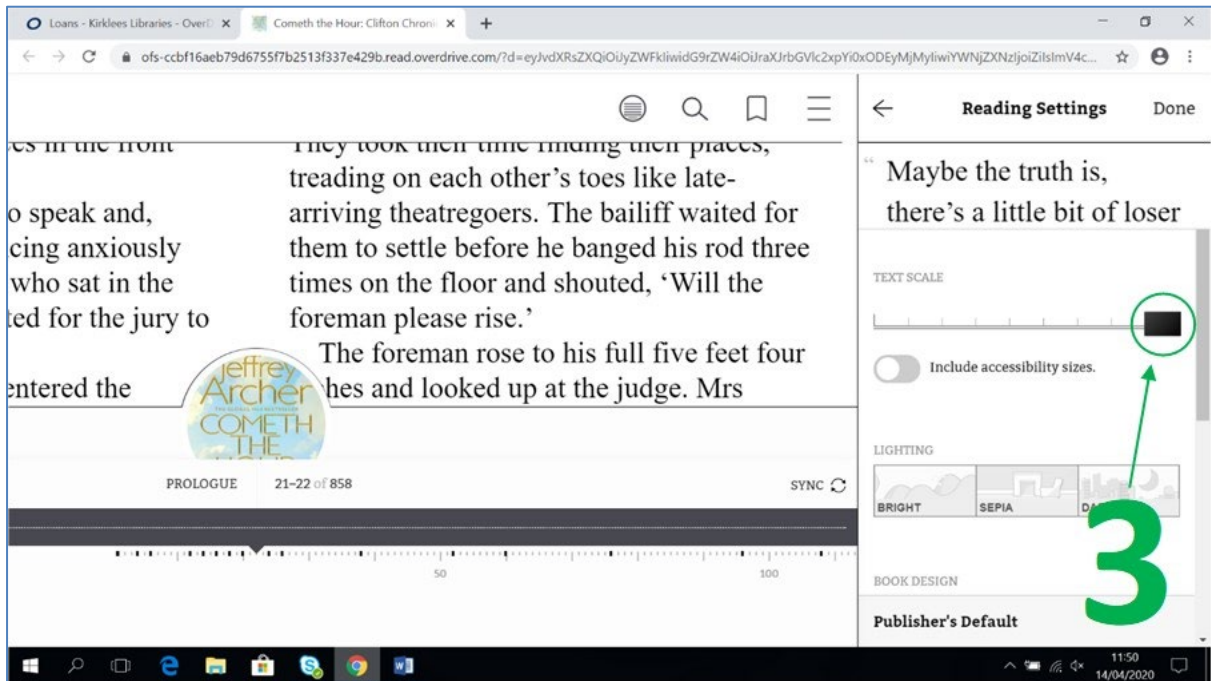

1. When the ebook you're reading is open, click the three horizontal lines at the top right corner.

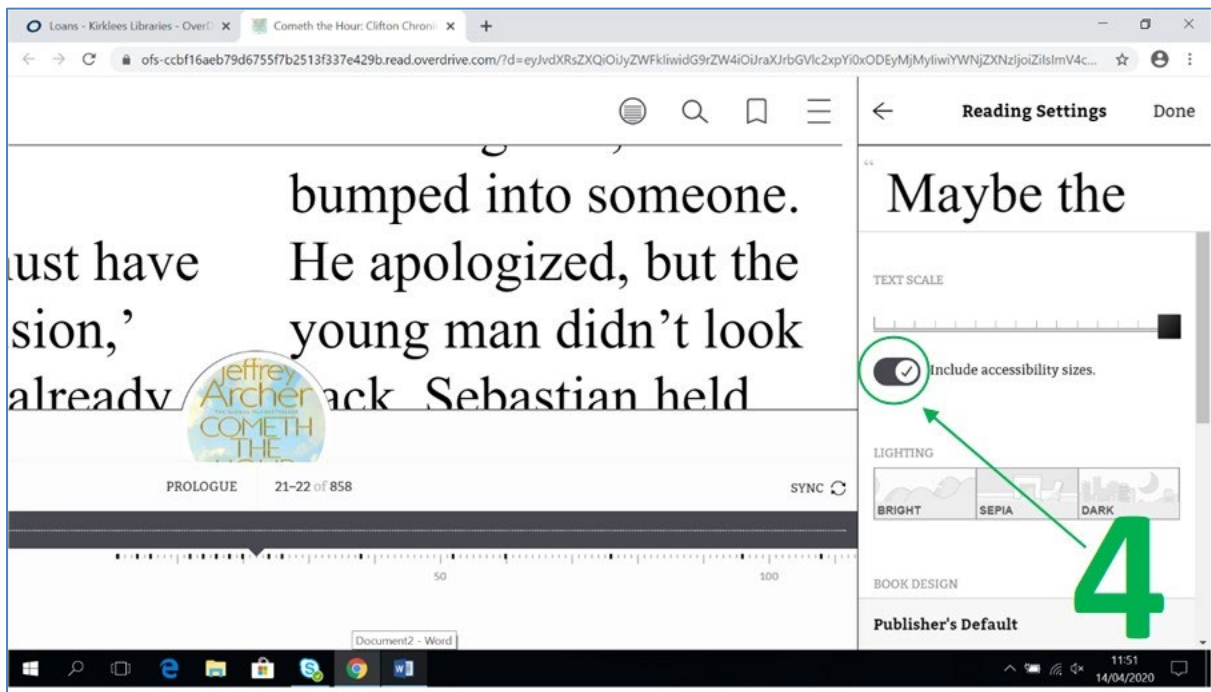

2. On the drop-down menu, select 'Reading Settings'.

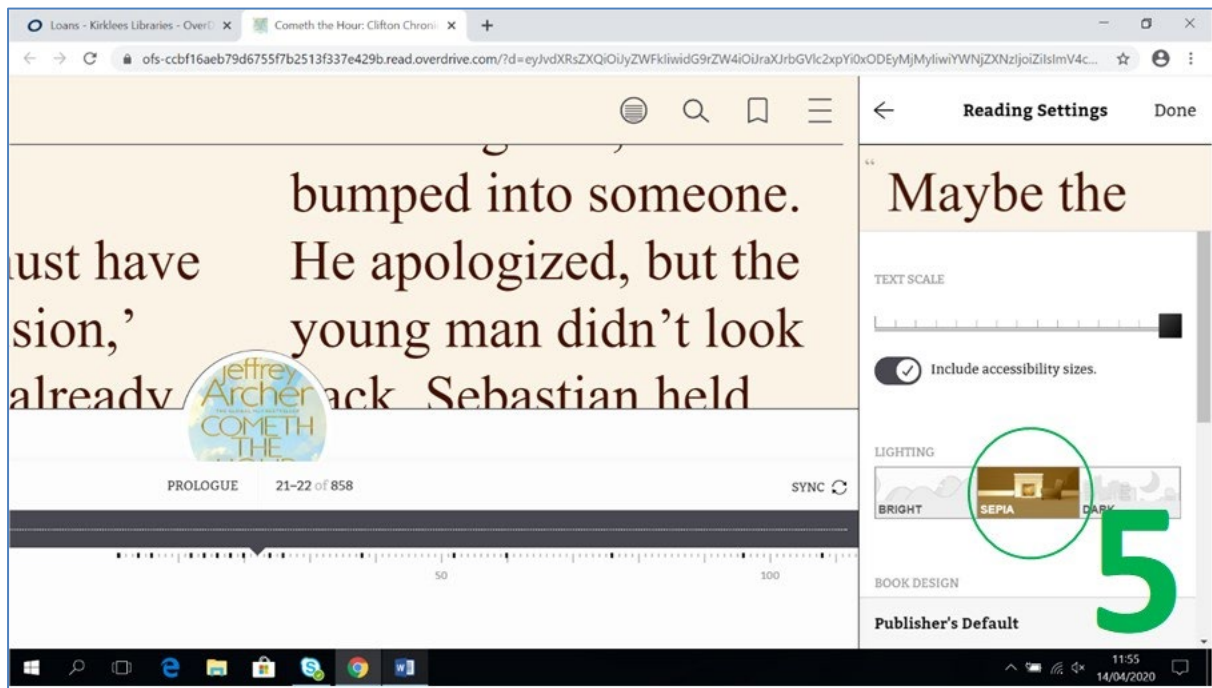

3. Click on the 'Text Scale' bar and move the black cursor along the notches to the right to increase the size of the text or the notches to the left to decrease.

4. Increase text size even more by clicking 'Include accessibility sizes'.

5. Click on the 'Lighting' section to change the screen colour to Sepia (cream with brown text) or Dark (black with white text).'
